

EXCELLENCE Dafra project

Lomé, Togo - On August 27, 2020, Dafra Pharma launched its "Excellence Dafra" project which it established in collaboration with the Junior Chamber International (JCI) of the Togolese Republic. On behalf of Dafra Pharma, our Sales Director in Western Africa, Franck Mondedji, expressed his support for the association of medical students, odonto pharmacy and JCI during a press conference at the University of Lomé in Togo. This conference was meant as the kick off of a competition among the students.

The project aims to reward the best students of the Faculty of Health Sciences while placing particular emphasis on the culture of excellence in higher medical education.

For this first edition, the project is foremost a competition which gives students the opportunity to register in 3 categories, namely:

1. *Scientific communication* (20 students will compete and 10 will be selected for the final)
2. *Eloquence*
3. *Medical engineering*

« This initiative which has just taken shape will undoubtedly make it possible to have in 5, 10 or 15 years of the best doctors », said Francis Amakoé Foli, president of JCI-TOGO.

According to Richard Koledji, our supervisor in Togo, the main objectives of this project are to increase awareness for our Belgian pharmaceutical laboratory and to establish partnerships between Dafra Pharma and numerous health professionals.

In order to motivate students to participate in this competition, several prizes are highlighted. Gifted youngsters can win the following gadgets: I5 and I3 core computers, cell phones as well as blood pressure monitors.
